ICC-ES PMG Issues New WaterSense Certification for Spray Sprinkler Bodies to Hunter Industries

This is ICC-ES PMG's first WaterSense Certification for Spray Sprinkler Bodies with integral pressure regulation

BREA, CALIF. — The ICC Evaluation Service (ICC-ES) PMG Listing Program has issued its first Listing Report (<u>PMG-1457</u>) with the WaterSense Certification for Spray Sprinkler Bodies to Hunter Industries, verifying their Pro-Spray PRS30 and Pro-Spray PRS40 Series comply with WaterSense Specification. Hunter's 4-, 6- and 12-inch pressure regulated pop-up sprays are designed for commercial or residential projects. (The test procedure in the aforementioned specification is based on ASABE/ICC 802-2014.)

"We are pleased to issue our first WaterSense Spray Sprinkler Certification to Hunter Industries," said ICC-ES PMG Director of Standards, Maribel Campos. "With the ICC-ES PMG listing and WaterSense certification, code officials can have confidence when approving this innovative technology."

ICC-ES PMG works with manufacturers interested in receiving both the WaterSense label and the ICC-ES PMG Listing Mark simultaneously. This program provides a one-stop shop for manufacturers to obtain a code conformance listing, a WaterSense listing, fast turnaround time, and an opportunity for broad market acceptance. The WaterSense Program protects water supply by promoting water efficiency and enhancing the market for water-efficient products and practices.

ICC-ES PMG also offers listings for water-efficient urinals, lavatory faucets, high-efficiency toilets, showerheads, spray sprinkler bodies, and landscape irrigation controllers, in accordance with EPA specifications.

For more information, contact ICC-ES PMG at 800-423-6587 x7643 or espmg@icc-es.org.

About ICC-ES

A nonprofit, limited liability company, ICC-ES is the United States' leading evaluation service for innovative building materials, components and systems. ICC-ES <u>Evaluation Reports</u> (ESRs), <u>Building Product Listings</u> and <u>PMG Listings</u> provide evidence that products and systems meet requirements of codes and technical standards. The ICC-ES Environmental Programs issue VAR environmental reports that verify a product meets specific sustainability targets defined by today's codes, standards, green rating systems and ICC-ES <u>environmental criteria</u>. The Environmental Programs now offer Environmental Product Declarations (<u>EPDs</u>), to meet global market demand for science-based,

transparent, quality-assured information about a product's environmental performance. ICC-ES is a member of the ICC Family of Companies. For more information, please visit www.icc-es.org.
