**To:** ICC-ES Report Holders and Applicants  
**From:** Gary G. Nichols, Vice-President, Engineering  
**Date:** October 25, 2016  
**Subject:** Supplemental reports under the *Florida Building Code* (FBC)

**MEMO**

---

This memo supersedes our memo of August 17, 2012, on the same subject. ICC-ES allows current report holders to obtain a supplemental report on their products under the 2014 *Florida Building Code* (FBC). Additionally, the Florida Building Commission has approved ICC-ES as a Validation Entity, which allows ICC-ES to offer this service, as well, to companies that obtain supplemental reports under the FBC.

A request to include recognition under the FBC can be made in conjunction with an application for a new report, or a revision to an existing report. The request must be made in writing. Recognition under the FBC will then be included in a supplemental report that is appended to the master evaluation report. For a product to be evaluated to the 2014 FBC, the master evaluation report's scope must include the 2012 International Codes.

ICC-ES has evaluated certain classes of building products to the HVHZ requirements of the FBC. Manufacturers who are interested in this service can contact ICC-ES for further information.

Holders of FBC supplemental reports who are interested in having ICC-ES serve as their Validation Entity should refer to our [memo of October 15, 2008](#) (updated October 25, 2016), for details.

Please contact ICC-ES if you have any questions, at (800) 423-6587, or by e-mail at [es@icc-es.org](mailto:es@icc-es.org).
