

Reasons Why Code Officials Accept ICC-ES Reports

The ICC Evaluation Service (ICC-ES), a subsidiary of the International Code Council (ICC), was created by code officials to serve the needs of code officials.

With 90 years of experience in product evaluation and building code publications, ICC-ES:

- Provides a comprehensive evaluation process with a vigorous peer review.
- Employs a complete staff of licensed engineers and architects in a variety of disciplines; no subcontractor review.
- Is the expert in developing Acceptance Criteria (ACs) for innovative products -- the only organization that can provide expert interpretation of the published ACs. Acceptance criteria are developed for use solely by ICC-ES for the purpose of issuing ICC-ES evaluation reports.
- Is in full compliance with section 1703 of the International Building Code®
- Is ANSI accredited

ICC-ES evaluation reports are tailored to meet the needs of the code official enforcing the international family of codes. The reports contain factual, relevant information needed by code officials in order to support their decision to allow subject building products in their jurisdiction.

ICC-ES evaluates products to help code officials approve them for installation.
