## Chui, Wong, Join ICC-ES Technical Staff

*Engineers broaden ICC-ES civil and structural engineering expertise*

Two engineers have joined the ICC Evaluation Service ([ICC-ES](http://www.icc-es.org)) technical staff in its Western Regional Office in Brea, Calif. Both are actively involved in industry associations and bring a wealth of technical knowledge and industry experience to ICC-ES.

“ICC-ES continues to grow and expand its staff resources to best serve our clients and manufacturers,” said ICC-ES President [Shahin Moinian](#). “We are committed to offering rigorous technical evaluations, the best customer service and timely issuance of reports.”

**Vincent Chui, P.E., S.E.**, is a Senior Staff Engineer with a primary focus on evaluation of anchor products. Chui is a licensed professional engineer in the state of California, and a licensed structural engineer in California and Nevada. He holds multiple degrees including a master’s degree in civil engineering from California State University and a bachelor’s degree in structural engineering from California Polytechnic State University. He serves on the National Council of Examiners for Engineering and Surveying as a structural engineering license exam grader and co-chairs the AISC 113 American Society of Civil Engineers subcommittee on the Design of Substation Structures. He performs a variety of complex structural design and seismic analysis in concrete, masonry, steel and wood structural systems, and develops engineering design and material specifications.

**Danny Wong, P.E.**, is a Staff Engineer who will work on a variety of evaluation reports as a general practitioner. He has more than 18 years of experience working on photovoltaic (PV) racking systems, steel fabrication and erection, steel joists, metal decking, engineered wood products, wood construction connectors, and wood, steel and aluminum fasteners. He has a working knowledge of the [International Codes](#), and seismic and wind design load provisions in ASCE/SEI-7. He is a licensed civil engineer and an active member of the American Society of Civil Engineers. He earned his bachelor’s degree in civil engineering with an emphasis in building science from the University of Southern California.

### About ICC-ES

A nonprofit, limited liability company, ICC-ES is the United States’ leading evaluation service for innovative building materials, components and systems. ICC-ES [Evaluation Reports](#) (ESRs), [Building Product Listings](#) and [PMG Listings](#) provide evidence that products and systems meet requirements of codes and technical standards. The ICC-ES Environmental Programs issue VAR environmental reports that verify a product meets specific sustainability targets defined by today’s codes, standards, green rating systems and ICC-ES [environmental criteria](#). The Environmental Programs now offer

Environmental Product Declarations ([EPDs](#)), to meet global market demand for science-based, transparent, quality-assured information about a product's environmental performance. ICC-ES is a member of the [ICC](#) Family of Companies. For more information, please visit [www.icc-es.org](http://www.icc-es.org).
