ICC-ES Adds Managerial Staff as an Investment in the Future

ICC Evaluation Service (ICC-ES) has begun 2011 by hiring a Director of Engineering and a Director of Sales. The new positions have been filled by highly trained and experienced individuals who will add substantially to ICC-ES's technical expertise and contribute, also, to its emerging culture of customer service.

Mike Temesvary, Director of Sales, brings to ICC-ES a rare combination of technical training and experience with business planning and marketing. Mike holds a B.A. in German and a B.S. in civil engineering, and is a licensed professional engineer. Before joining ICC-ES, Mike had his own structural engineering firm in Los Angeles, managing construction projects from initial planning through completion. At ICC-ES, Mike will report to Michael Beaton, the Senior Vice-President, and will work with the business development, marketing, and client relations staffs. It will be Mike's task to maintain ICC-ES's current client list, educate potential customers about ICC-ES services, and bring new business to the organization. Mike has hit the ground running, and is already lending direction to ICC-ES sales efforts.

ICC-ES's new Director of Engineering is Jim Collins, a man with many years of experience in leading technical teams and helping organizations to grow. Jim is a licensed engineer with B.Sc., M.Sc., and Ph.D. degrees in civil engineering. Schooled in New Jersey, Jim was Chief Engineer at Illinois Tool Works (ITW) before coming to ICC-ES. While leading an ITW team of engineers and administrators, Jim pushed through training programs, developed team leaders, and significantly increased productivity. Like Mike Temesvary, Jim will be based at the ICC-ES Whittier office, and will report to Senior Vice-President Michael Beaton. Beaton and other ICC-ES managers believe that Jim will perform similar feats at ICC-ES to what he did at ITW, and help to lead the organization into a future of expanding business and greater staff cohesiveness and productivity.

A nonprofit, limited liability company, ICC-ES is the United States' leading evaluation service for innovative building materials, components and systems. The ICC-ES [Evaluation Reports](#) and [PMG Listing Program](#) provide evidence that products and systems meet requirements in codes and standards. The [ICC-ES SAVE Program](#) provides manufacturers with verification that their products meet specific sustainability targets defined by today's codes, standards and green ratings. The program also takes into account codes such as the International Green Construction Code (IGCC) and the California Green Building Standards Code (CALGreen). ICC-ES is a subsidiary of the [International Code Council](#).
