New ICC-ES Expedited Service Earns Positive Response

ICC Evaluation Service ([ICC-ES](http://www.icc-es.org)) applicants and clients have been quick to take advantage of the recently introduced ICC-ES [Expedited Service](#)—a service developed to meet their growing market entry needs. ICC-ES clients that qualify for this program can expect turnaround times of no more than six months for new report applications and no more than three months for revisions. Reports evaluated under this service are designated as priority projects and include the same thorough technical evaluation in a condensed amount of time with one main point of contact.

“Our goals are to serve our customers’ needs and provide evaluation reports code officials can rely upon to ensure safety in the built environment,” said ICC-ES President, [Shahin Moinian](#). “As part of the International Code Council ([ICC](#)), manufacturers and code officials recognize that ICC-ES has unique qualifications and expertise in the evaluation of products to determine if they are in compliance with the code.”

With more than a dozen applications in various stages of the expedited evaluation process, several have already completed their evaluations. Some of the first report holders to be successfully evaluated under this new program are: National Coatings Corporation ([ESR-2140](#)); Master Wall, Inc. ([ESR-1181](#)); KP Building Products ([ESR-1517](#)); Kaycan, Ltd. ([ESR-1495](#)); Boral Roofing, LLC ([ESR-3496](#)); Hayes Specialty Machining, Ltd. ([ESR-1356](#)) and FSR Treatment, Inc. ([ESR-1410](#)).

To find out if your product qualifies for the expedited service, contact Michael Temesvary, ICC-ES Director of Sales at 1-800-423-6587 ext. 3877 or mtemesvary@icc-es.org

About ICC-ES

A nonprofit, limited liability company, ICC-ES is the United States’ leading evaluation service for innovative building materials, components and systems. ICC-ES [Evaluation Reports](#) (ESRs), [Building Product Listings](#) and [PMG Listings](#) provide evidence that products and systems meet requirements of codes and technical standards. The ICC-ES Environmental Programs issue VAR environmental reports that verify a product meets specific sustainability targets defined by today’s codes, standards, green rating systems and ICC-ES [environmental criteria](#). The Environmental Programs now offer Environmental Product Declarations ([EPDs](#)), to meet global market demand for science-based, transparent, quality-assured information about a product’s environmental performance. ICC-ES is a subsidiary of the [International Code Council](#)[®] (ICC[®]). For more information, please visit www.icc-es.org.
