ICC Evaluation Service Exhibits at 17th Annual Kitchen and Bath Show China (KBIS)

ICC Evaluation Service PMG (ICC-ES PMG), a premier North American product certification body for plumbing, mechanical and fuel gas products, exhibited at the Kitchen and Bath Show China (KBIS) for the first time in May. The event, held in Shanghai, China's financial and economic center, is the largest trade show for kitchen and bath products. It attracts manufacturers, professionals and consumers from around the world.

ICC-ES has been evaluating building products for decades; its reputation among building officials is widely recognized and trusted. The presence of ICC-ES indicates its willingness to help Chinese manufacturers by providing an alternative solution for their product evaluation needs. ICC-ES staff had the opportunity to interact with a number of manufacturers and professionals who were enthusiastic to learn about the ICC-ES certification process for new product listings.

Additionally, ICC-ES held a seminar that featured a presentation from Maribel Campos, ICC-ES Director of Standards, in which she illustrated the similarities and differences between ICC-ES and other certification bodies. "Chinese manufacturers were excited to learn that they now have another option for certification of their plumbing products to the North American codes and standards," said Campos.

ICC-ES staff attending the show were very satisfied with the outcome and results. "We are pleased to have received numerous inquiries from manufacturers and industry professionals attending the show. We are confident that our PMG listing program will benefit them in many ways and look forward to ICC-ES being their first choice when it comes to product certification," said Qiaoli Meng, ICC-ES PMG Product Review Engineer. About ICC-ES

A nonprofit, limited liability company, ICC-ES is the United States' leading evaluation service for innovative building materials, components and systems. ICC-ES [Evaluation Reports](#) (ESRs) and [PMG Listings](#) provide evidence that products and systems meet requirements of codes and technical standards. ICC-ES also issues environmental reports verifying that products meet specific sustainability targets defined by today's codes, standards, green rating systems and ICC-ES [environmental criteria](#). ICC-ES is a subsidiary of the [International Code Council](#)® (ICC®). For more information, please visit www.icc-es.org.
