TRANSFER AND SAVE Transfer Your AB 1953 (Lead Plumbing Law) Certification Service to ICC-ES

Manufacturers looking for certification to California's Low Lead Plumbing Law, Section 116875 of the California Health and Safety Code, can now transfer their listings to ICC Evaluation Service (ICC-ES) and save money. ICC-ES provides a high quality, low-cost service to address the needs of plumbing manufacturers in these tough economic conditions.

Although the deadline for compliance to the law has come and gone, ICC-ES is ready and willing to accept transfer of such listings from any accredited certification body. "We can certify to both AB 1953 and Annex G of NSF/ANSI 61. Therefore, all the clients have to do is to apply and save money," said Jay Peters, Executive Director, PMG, International Code Council.

ICC-ES offers a free AB 1953 or Annex G listing to manufacturers who decide to list with ICC-ES or transfer their related performance file to ICC-ES. "For example, if clients decide to certify their faucets with ICC-ES, we will be able to do that for you. But we will give them the AB 1953 listing, which is required by the state of California, at no charge" says Shahin Moinian, Executive Director, ICC-ES Certification Programs.

A nonprofit, limited liability company, ICC-ES is the United States' leading evaluation service for innovative building materials, components and systems. The ICC-ES [Evaluation Reports](#) and [PMG Listing Program](#) provide evidence that products and systems meet requirements in codes and standards. The [ICC-ES SAVE Program](#) provides verification that products have been independently verified as having the sustainable attributes claimed by the manufacturer to develop and advance sustainable design and construction. ICC-ES is a subsidiary of the [International Code Council](#). For more information about ICC-ES®, visit www.icc-es.org.
