ICC-ES PMG Now Offers Product Certification to NSF/ANSI 61 for LESS

ICC-ES is pleased to announce the premier product certification program that verifies compliance with NSF/ANSI 61. This program features the technical expertise that ICC-ES clients are accustomed to and expect, but at a low cost.

ICC-ES now has access to the best test equipment and highly-skilled personnel for testing to the requirements of NSF/ANSI 61. ICC-ES uses a Ph.D. Toxicologist for the evaluation of the test report to assure an unsurpassed level of quality in product evaluation.

ICC-ES also offers a free AB 1953 or Annex G listing to manufacturers who decide to list their products with ICC-ES or transfer their NSF/ANSI 61 product listings. ICC-ES's everyday certification prices are a fraction of those of other certification bodies. "Our quality of product review is the highest in the industry, our turnaround is unparalleled, you can't ask for anything more," says Shahin Moinian, Executive Director, ICC-ES Certification Programs.

For More information, please contact ICC-ES®, at es@icc-es.org or visit www.icc-es.org

A nonprofit, limited liability company, ICC-ES is the United States' leading evaluation service for innovative building materials, components and systems. The ICC-ES [Evaluation Reports](#) and [PMG Listing Program](#) provide evidence that products and systems meet requirements in codes and standards. The [ICC-ES SAVE Program](#) provides verification that products have been independently verified as having the sustainable attributes claimed by the manufacturer to develop and advance sustainable design and construction. ICC-ES is a subsidiary of the [International Code Council](#).
