ICC-ES PMG Issues Listing on Perma Liner Pipe Lining System

ICC-ES has issued PMG-1068 to Perma-Liner pipe lining system, verifying that it meets the requirements of ASTM F 1216, *Standard Practice for Rehabilitation of Existing Pipelines and Conduits by the Inversion and Curing of Resin-Impregnated Tube*; NSF 14; ICC-ES PMG Listing Criteria 1011, *Rehabilitation of Existing Building Drains and Building Sewers by the Inversion and Curing of Resin-impregnated Tube*; and the requirements of the *International Plumbing Code*® and *Uniform Plumbing Code*.

Perma-Liner is one of the many manufacturers who have decided to use ICC-ES for their certification needs in North America. “I am very pleased with our choice to use ICC-ES for our certification needs,” said Cole Perkins. “Their process is simple yet thorough. Their certificates are accepted by authorities having jurisdiction, because they are aware of the thoroughness of ICC-ES reports and listings.”

ICC-ES offers this and many other certification services to plumbing manufacturers. “Our goal is to satisfy clients with fast, yet thorough product certification,” said Dawn LaFleur-Qualley, Certification Program Manager. “We are here to deliver the services that our clients need and deserve.”

A nonprofit, limited liability company, ICC-ES is the United States’ leading evaluation service for innovative building materials, components and systems. ICC-ES [Evaluation Reports](#) and the [PMG Listing Program](#) provide evidence that products and systems meet requirements in codes and standards. The [ICC-ES SAVE Program](#) provides verification that products have been independently verified as having the sustainable attributes claimed by the manufacturers. ICC-ES is a subsidiary of the [International Code Council](#).
