ICC-ES PMG Expands its Business in China, Europe, India and South America

ICC-ES PMG announces that it has further expanded its product certification activities in China, Europe and South America, to address the need for certification of Plumbing, Mechanical, and Fuel Gas products to be sold in the North American market.

ICC-ES PMG has collaborated with a number of ISO/IEC 17025 accredited laboratories in order to show its flexibility in accepting test reports from reputable, high-quality testing laboratories while allowing clients to select the laboratory of their choice in the geographic location closest to their manufacturing plant.

“Unlike many product certification agencies, ICC-ES PMG gives its clients throughout the world a choice of literally thousands of reputable accredited testing laboratories,” said Dawn LaFleur-Qualley, ICC-ES Certification Program Manager. “We not only accept test reports from laboratories accredited by International Accreditation Service (IAS), which is a subsidiary of ICC and an ILAC-MLA signatory accrediting agency with a list of more than 500 accredited laboratories; but also from testing laboratories accredited by other signatories, such as CNAS in China. The same is true for laboratories accredited by other accreditors in Europe, South America, India and elsewhere. This level of flexibility is unmatched by any other high-quality certification body.”
