ICC-ES PMG Certifies MASCO Shower Bases

ICC-ES has announced that the MASCO Bath shower base with trench drain has been certified as meeting the requirements of the *International Plumbing Code (IPC)*, the *International Residential Code (IRC)*, ANSI Z124.1.2-2005 and other codes.

MASCO is a premier plumbing product manufacturer that has decided to use ICC-ES for its certification needs in North America. “We benefited from a very rapid turnaround time,” said Justin Belickis, MASCO Product Engineer. “We needed to meet our internal timelines and ICC-ES helped us deliver.”

ICC-ES offers building and plumbing product certification services to manufacturers. “If what you need is rapid time-to-market, highest quality of review and highest acceptance of the mark at a fraction of the cost, you can come to us and we can provide all of these for you,” said Dawn LaFleur-Qualley, Certification Program Manager for ICC-ES.

A nonprofit, limited liability company, ICC-ES is the United States’ leading evaluation service for innovative building materials, components and systems. ICC-ES [Evaluation Reports](#) and the [PMG Listing Program](#) provide evidence that products and systems meet requirements in codes and standards. The [ICC-ES SAVE Program](#) provides manufacturers with verification that their products meet specific sustainability targets as defined by today’s green rating systems, codes and standards. The program also takes into account mandatory codes such as the California Green Building Standards Code (CALGreen) and the International Green Construction Code (IGCC). ICC-ES is a subsidiary of the [International Code Council](#).
