ICC-ES Expands Resources for Applicants

In an ongoing effort to improve service to its applicants, ICC-ES has added [TJC and Associates](#) to the list of organizations it works with to provide excellent communication throughout the ICC-ES Evaluation Report product review process, and faster turnaround times from application to issuance of final reports.

TJC and Associates (TJCAA) can work directly with the applicant to expedite the evaluation process for manufacturers of Structural Insulated Panels (SIPs), foam plastic insulation, joist hangers, roof flashing and modular framing systems used to support Photovoltaic (PV) modules as an additional option when applying for an evaluation report. TJCAA provides engineering services to clients throughout the United States.

"The secret to a successful evaluation with ICC-ES is preparation, establishment of a clear scope of work and a thorough submittal. TJCAA and its sister companies Terrapin Testing (testing) and C.I. Professional Services (inspections) have worked with ICC-ES for many years and have an excellent working knowledge of our requirements and procedures. This announcement only formalizes what we have been doing already," says [Michael Beaton](#), ICC-ES Senior Vice-President.

Manufacturers who work through TJC and Associates to gain an ICC-ES Evaluation Report will benefit by having a knowledgeable and experienced company guide them through the process in an expedited time-frame, from development of test plans and scheduling of inspections to a final draft report for ICC-ES review.

For more information, please contact Mike Temesvary, ICC-ES Director of Sales, at 1-800-423-6587 ext. 3877 or mtemesvary@icc-es.org.

About ICC-ES

A nonprofit, limited liability company, ICC-ES is the United States' leading evaluation service for innovative building materials, components and systems. ICC-ES [Evaluation Reports](#) (ESRs) and [PMG Listings](#) provide evidence that products and systems meet requirements of codes and technical standards. ICC-ES also issues environmental reports verifying that products meet specific sustainability targets defined by today's codes, standards, green rating systems and ICC-ES [guidelines](#). ICC-ES is a subsidiary of the [International Code Council](#)® (ICC®). For more information, please visit www.icc-es.org.
