
The ICC-ES Expedited Service Program: What You Need to Know

ICC-ES has implemented an Expedited Service for both new reports and revisions provided:

- ✓ The product does not require development of or revisions to an acceptance criteria.
- ✓ A complete data package is submitted at the time of application in order to proceed with an expedited review.

The ICC-ES GUARANTEE:

Time-to-completion for projects under expedited review (once all technical and QC information has been received and successfully evaluated) shall be as follows:

- ✓ No more than four months for new report applications.
- ✓ No more than three months for revisions.

How it will work:

- The application will receive priority and additional resources.
- This priority will continue until the report is completed. The engineer will be available to service the file until the project is completed.
- An account manager will track the project and coordinate with the assigned engineer.
- An expedited fee will be assessed for the project with an invoice for the expedited fee generated at the beginning of the project.

To find out if your product may qualify for this new program, please contact ICC-ES Director of Sales and Partnerships, **Michael Temesvary** at 1-800-423-6587, ext. 3877
