SAMPLING AND TESTING INSTRUCTION FOR LABORATORY

Inspection Date:	Previous Inspection Date:	
Listee's Name:	Listing No.:	
Manufacturer's Name (if different from listee):		
Manufacturer's Contact Name:		
	Email:	
Manufacturer's Address:		
City:	State:	Zip:
Country:		
Product Name & Description:		

Select listed products at random for testing to ensure they are still complying with the applicable requirements:

- Samples for testing and examination shall be selected in accordance with the specified relevant requirements. They shall be representative of the models to be listed and made using components and subassemblies identical to those used in production. Samples selected shall also be made from production tools and assembled using methods established for the production run.
 - Obtain enough samples for testing using a means so that the selected samples cannot be substituted.

Whenever possible, also obtain an equal number of samples from the same batch for backup using the same method above, and leave these samples with the manufacturer. The backup samples are to be used in case the original samples, being sent to the laboratory, get lost during shipping or in case there is a failure during testing by the laboratory and the listee wants to retest to confirm the results. The manufacturer can use the backup samples again once the laboratory has issued a test report based on the original selected samples.

Attach only this page on the selected samples for testing with the name and address of the laboratory properly shown on the front for the purpose of shipping. \square N/A \square S Πυ

C	n-site witness	testing	(ensure	that the	equipment	used is	calibrated)	
---	----------------	---------	---------	----------	-----------	---------	-------------	--

Inspector, please make sure that the following are properly addressed:

- The laboratory has the appropriate scope of capabilities. If not, then find another laboratory.
- Is the laboratory accredited by IAS or by an accreditation body that is a signatory to the International Laboratory Accreditation Cooperation (ILAC) Mutual Recognition Arrangement (MRA) or otherwise recognized by ICC-ES?

Name of recognized/accredited laboratory: _

City:	State:	Zip:	Country:
Phone:	Fax:	Ema	nil:
Laboratory Accredited by:			
Listed Mod	lel Number(s)		Test Criteria

A copy of the test results shall be sent directly to ICC-ES business/regional office in Brea, CA.

Test reports must comply with ICC-ES Acceptance Criteria for Test Reports (AC85) and must clearly indicate models listed by ICC-ES and must show satisfactory compliance to the correct standard and the correct edition. www.icc-es.org/criteria/pdf files/ac85.pdf.

The manufacturing date of the selected sample:

There are no abnormalities observed on the selected samples. If yes, explain the type of abnormalities:

The selected samples are required to be sent by the manufacturer to a recognized laboratory within 72 hours of the selection date. If the manufacturer can not send the selected samples within the specified time, the manufacturer shall explain to ICC-ES in writing why there was a delay in sending the samples to the recognized laboratory. The costs associated with sending the selected sample(s) to the laboratory, and for testing of the selected sample(s) by a recognized laboratory, is the responsibility of the listee/manufacturer.
