4.0 LISTING CRITERIA

4.1 Basis of Developing Listing Criteria

Listing criteria are established by the committee to provide a basis for issuing ICC-ES listings on products and systems under codes referenced in Section 3.0 of the ICC-ES PMG Rules of Procedure for Product Listings. The listing criteria also clarify conditions of acceptance for products and systems specifically regulated by the codes. Listing criteria may involve a product, material, components or systems thereof. Consideration of any listing criteria must be in conjunction with a current and valid Application for Listing, an existing listing, or as otherwise determined by the Product Listing Committee.

4.2 Procedure for Developing Listing Criteria

4.2.1 The applicant is informed by the technical staff that a criteria is needed to list his or her product.

4.2.2 Proposed listing criteria shall be developed by the applicant with input from the ICC-ES technical staff.

4.2.3 Proposed listing criteria shall be forwarded to the Product Listing Committee at least ten business days before the meeting or conference call, on the criteria, occurs.

4.2.4 The committee shall be informed of all pertinent written communications received by ICC-ES from the proponent.

4.2.5 The proponent of the proposed listing criteria shall have an opportunity to address the Product Listing Committee and provide information on the proposal.

4.2.6 Committee approval of listing criteria shall be as specified in Section 3.5 of these rules.

4.2.7 If the Product Listing Committee votes to accept the proposed listing criteria, the criteria is then posted on the ICC-ES web site for a 20-day period of public review and comment. If no comments are forthcoming, particularly comments related to health and safety, the proposal becomes an approved listing criteria. If a valid comment is raised, the draft criteria may be brought back before the Product Listing Committee for review.

4.2.8 If the Product Listing Committee votes to deny the proposed listing criteria, the listing criteria is then returned to the applicant. The applicant may revise the proposed criteria and bring it back to the committee for another review.

5.1 Negative votes must be based upon one or more of the following, for the ballots to be considered valid and require resolution:

(The areas where clarification is required must be specifically identified.)
