## About ICC-ES

For over 90 years, ICC-ES has served as an industry leader in performing technical evaluations of building products, materials and systems for code compliance. ICC-ES is accredited by the ANSI National Accreditation Board (ANAB), the American Association for Laboratory Accreditation (A2LA), the Standards Council of Canada (SCC), and the Joint Accreditation System of Australia and New Zealand (JASANZ).

## Contact Us

For more information on how ICC-ES can assist with your product certifications, visit our website at [icc-es.org](http://icc-es.org) or contact us at [es@icc-es.org](mailto:es@icc-es.org)

# What Sets ICC-ES Apart

Industry  
Leading Codes

International Codes (I-Codes), developed by the International Code Council, are the most widely accepted, comprehensive set of model codes used in the United States. ICC-ES reports provide an independent evaluation of how your product meets performance and prescriptive provisions in the I-Codes.

Exclusive Use of ICC-ES  
Acceptance Criteria (AC)

ACs are developed solely for the purpose of issuing ICC-ES evaluation reports. This exclusivity ensures that our criteria and reports remain the gold standard. No other certification body can be accredited to conduct product evaluations to ICC-ES ACs.

ICC-ES ACs are created through a transparent public process, ensuring they reflect the latest industry standards and best practices.

Comprehensive  
Testing, Inspection  
and Certification

**Rigorous Plant Inspections:** Our certification process includes extensive inspections of manufacturing plants, ensuring ongoing compliance with quality standards.

**Accredited Testing Laboratories:** Our laboratories are accredited and staffed by highly competent personnel, providing accurate and reliable testing results. ICC-ES test lab capabilities are extensive, ensuring that your products can be thoroughly evaluated against a wide range of standards and criteria.

Market  
Confidence

ICC-ES evaluation reports provide a mark of excellence recognized by code officials, designers, and specifiers, ensuring your products are considered compliant with codes and standards.

Broad Industry  
Experience

With a robust library of experience across multiple certification programs—including building, plumbing, and solar—ICC-ES offers unparalleled expertise to support your product certifications.

Streamlined Approval  
Processes

Our comprehensive and efficient evaluation process helps expedite market entry, saving you time and resources and providing professional guidance through the entire process.

Enhanced Product  
Credibility

An ICC-ES report signifies that your product has been rigorously evaluated, enhancing its credibility and competitive edge.
