## **Craig Morr Joins ICC-ES as Vice President of Quality Systems**

*New addition serves as resource to drive growth in new markets*

**Brea, CA** – The ICC Evaluation Service (ICC-ES) welcomes Craig Morr as the new Vice President of Quality Systems. He joins us with an extensive background in operations, quality and compliance, and has served on several boards and committees including International Accreditation Service (IAS) and American National Standards Institute (ANSI).

With over a decade of experience with NSF International as Director of Quality and Compliance, Morr led the expansion of NSF's accreditation portfolio as well as on-boarded the Global Food Safety Initiative schemes. He was also a key member in the integration of mergers and acquisitions.

Morr brings his expertise in conformity assessment standards, quality management systems, lean process management, as well as regulatory and accreditation processes. With proven leadership in regulated environments, the service industry, and in product development, Morr joins ICC-ES to guide the strategic direction and expansion into new markets and industries.

"Craig will be a great asset in maintaining the integrity and efficacy of ICC-ES' quality systems as well as continuing to build strong relationships with local and state agencies, and national and international accreditation bodies," said David Pereg, Senior Vice President of ICC-ES Operations.

*"I am very honored to join the accomplished ICC-ES team, delivering conformity solutions to the built industry and beyond," said Craig Morr. "The high standard of customer service excellence that the ES team delivers is something very exciting to be a part of, and I look forward to maintaining the company's strong leadership presence in the industry while shaping the strategic direction of ICC-ES."*

For more information, contact ICC-ES at 800-422-7233 or [es@icc-es.org](mailto:es@icc-es.org).

### **About ICC-ES**

A nonprofit, limited liability company, ICC-ES is the United States' leading evaluation service for innovative building materials, components and systems. ICC-ES [Evaluation Reports](#) (ESRs), [Building Product Listings](#) and [PMG Listings](#) provide evidence that products and systems meet requirements of codes and technical standards. The ICC-ES Environmental Programs issue VAR environmental reports that verify a product meets specific sustainability targets defined by today's codes, standards, green rating systems and ICC-ES [environmental criteria](#). ICC-ES is a member of the [ICC](#) family of solutions.
