NOTES FOR TABLES 1 THROUGH 12:

1. Fees cover a product listed to one standard. A separate application and listing is required for each additional standard. Applications for new listings must be accompanied by the basic fee and one copy of supporting documentation.

2. Fees are nonrefundable. The basic fee covers the application for Tables 1, 2, 6, 7, 8, 9, 10, 11 and 12 and one year of listing maintenance.

3. An application, unless otherwise noted, is reviewed under the latest editions of the applicable International Codes.

4. A manufacturing listee is a company name appearing on an existing evaluation report listing that is in addition to the report holder’s name, and manufacturers the product under the report listing.

5. A private label listee is a company name appearing on an existing evaluation report listing that does no manufacturing under the evaluation report, but merely takes the manufactured product and sells it under its own private label.

6. If a manufacturing facility has had a previous qualifying inspection for an evaluation report or listing, a second qualifying inspection may not be needed where the previous qualifying inspection is deemed sufficient by the reviewing technical staff.

7. The listee will be charged an additional $200 per hour for inspections requiring more than three hours.

8. Travel expenses for qualifying inspections are to be paid by the listee. If a qualifying inspection is necessary and the manufacturing facility is located within the U.S. or Canada, travel expenses will be billed at $600 per facility; if the manufacturing facility is located outside the U.S. or Canada, travel expenses will be billed at $1,750 per facility.

9. For non-domestic inspections, the inspector’s travel time will be billed at $700 for each 8-hour day in excess of one 8-hour day.

10. Renewal involves an annual review of the listing to verify that:
   - The standard or the code governing the product has not undergone any revision that affects the listing.
   - The listed product has not changed, from the initial submittal or since the previous inspection, as to product formulation, raw materials, suppliers of raw materials, or manufacturing method.
   - There are no complaints or legal actions pending, related to code compliance, about the products covered by the listing.
   - The applicable ICC-ES Rules of Procedure or policies have not changed in such a way as to affect the listing.

11. Additional fee charged for significant technical review, where the review will entail more than eight engineering hours.

12. For applications where supporting data includes test reports from non-accredited laboratories, an on-site assessment of the facilities of each such laboratory shall be conducted as set forth in the ICC-ES Rules of Procedure for Building Product Listing Reports. An assessment fee of $995 per assessor day, plus expenses, is applicable. Assessor travel time is billed at the rate of $700 per 8-hour day. Typically, an on-site laboratory assessment takes one assessor day.

13. In the case of reports featuring private label listees, this fee will be charged for each such listee, and the result multiplied by the number of inspected manufacturing facilities. For follower reports that don’t involve private label listees, the fee is charged for the follower and multiplied by the number of manufacturing locations.

14. This fee applies when an ICC-ES representative witnesses testing as part of the inspection of a manufacturing facility.

15. Private label follower listings are separate listings that may be issued to distributors of products already covered in a listing. An agreement is required between the existing listing holder and the new applicant for a follower listing.

16. If a file/listing becomes inactive for 2 years or more, a $995 annual fee will be assessed.

17. Without an application form, minor editorial corrections to a published evaluation report listing can be processed, with a written request from the listing report holder and a processing fee of $995. Also, minor administrative revisions to the listing file can be considered without an application form, such as: (a) Change in office address; (b) Move of manufacturing location, without significant changes; and (c) Removal of a manufacturing location.

18. For listings to standards that are equivalent to ICC-ES Acceptance Criteria, the fees will be according to the Fee Schedule for Evaluation Service Reports.
