ICC-ES Test Labs Solidify Company's Position as a Full-Service Testing, Inspection and Certification Agency

Test laboratories formerly known as ICC-NTA now operate and are industry-recognized as ICC-ES labs

Brea, CA – To solidify ICC-ES as a one-stop-shop for testing, inspection, and certification, services offered by the ICC-NTA Building and Plumbing Products division, including inspections, testing, and certification engineering, are being branded as ICC-ES, effective immediately.

The acquisition of NTA into the ICC Family of Solutions in 2019 greatly expanded the services the Code Council provides by adding testing and inspection capabilities. This important addition streamlines the technical evaluation process provided by ICC-ES. Both teams working together simplifies the process for clients as verified resources can readily be shared across companies, eliminating the need for additional communication steps.

The company is working with the respective accreditors to ensure a seamless transition to the ICC-ES brand and with no disruption to current report holders. The ICC-NTA brand will remain associated with off-site construction services, including plan review, inspection and certification of modular home systems.

NTA test laboratories are now recognized as ICC-ES test laboratories.

“ICC-ES has always been dedicated to building safety and customer service,” said Executive Vice President of the ICC Conformity Assessment Group and ICC-ES President David Tompos. “Operating our testing facilities as ICC-ES further solidifies our mission of being the conformity assessment agency of choice - providing all testing, inspection and certification services as a singular and efficient solution for manufacturers.”

Test laboratory locations span several states to offer local [testing options](#) to

customers, from Texas to Indiana. For more information and frequently asked questions, please visit www.icc-es.org.

###

About ICC-ES

ICC-ES is the leading evaluation service for innovative building materials, components and systems. ICC-ES [Evaluation Reports](#) (ESRs), [Building Product Listings](#) and [PMG Listings](#) provide evidence that products and systems meet requirements of codes and technical standards worldwide, including the US, Canada, Mexico, Australia, New Zealand, and the MENA region.
