ICC-ES and SolarPTL Enter Memorandum of Understanding

Mutual cooperation in the field of solar technologies will benefit manufacturers

Brea, CA – ICC Evaluation Service (ICC-ES), a provider of evaluation reports and listings of building construction products, and [Solar PTL](#), an electrical testing laboratory, have signed a Memorandum of Understanding (MOU) in which both parties agree to provide services to streamline the process of testing and listing for manufacturers.

Through the Solar Rating and Certification program ([SRCC](#)), ICC-ES certifies solar thermal collectors, solar thermal systems and components as well as photovoltaic water heaters. ICC-ES certifications are designed to help manufacturers comply with requirements in the United States, Canada, Mexico and the Caribbean region.

"The cooperation between ICC-ES/SRCC and SolarPTL provides an additional value to manufacturers looking to test and certify their solar building product" said ICC-ES President, Shahin Moinian P.E. "We are always looking to provide an efficient customer experience for our clients while maintaining the strict standards of safety and quality that ICC-ES is known for."

About ICC-ES

A nonprofit, limited liability company, ICC-ES is the United States' leading evaluation service for innovative building materials, components and systems. ICC-ES [Evaluation Reports](#) (ESRs), [Building Product Listings](#) and [PMG Listings](#) provide evidence that products and systems meet requirements of codes and technical standards. The ICC-ES Environmental Programs issue VAR environmental reports that verify a product meets specific sustainability targets defined by today's codes, standards, green rating systems and ICC-ES [environmental criteria](#). ICC-ES is a member of the [ICC](#) family of solutions.
