2021 and 2017 Massachusetts State Building Code 780 CMR Ninth Edition: Chapter 28 ASME B31 Code for Pressure Pipe; standards B31.1-2022, B31.3-2022 and B31.9-2020

*Copyrighted publication of the International Association of Plumbing and Mechanical Officials.

Compliance with the following standards:

ASTM B88-2022, Standard Specification for Seamless Copper Water Tube

ICC-ES LC1002-2010 (Editorially revised Feb 2013), Press-Connection Fittings for Potable Water

Tube and Radiant Heating Systems

NSF/ANSI/CAN 61-2023, Drinking Water Systems Components—Health Effects NSF/ANSI/CAN 372-2022, Drinking Water System Components – Lead Content

ASME B16.51-2021, Copper and Copper Alloy Press-Connect Pressure Fittings

ASTM B75-2020, Standard Specification for Seamless Copper Tube

ASTM F3226-2019, Standard Specification for Metallic Press-Connect Fittings for Piping and Tubing

Systems

IAPMO/ANSI/CAN Z1117-2022, Press Connections

Identification:

Fittings: The Viega LLC ProPress fittings must bear a permanent marking with the following information:

- Manufacture's name (Viega) or trademark.
- Nominal size corresponding to the copper tube size.
- Date of manufacture (date code or batch code).
- Mark of third-party testing agency.
 - 1. Standard products to be marked NSF® 61.
 - 2. Low lead products to be marked NSF® 372 or NSF® 61 G.
- Packages of fittings must bear the manufacture's name (Viega), product name (ProPress), model number and the ICC-ES PMG listing mark.

Installation:

Viega ProPress fittings must be installed in accordance with this listing, the applicable code and the manufacturer's published installation instructions. The manufacturer's published installation instructions must be furnished to the code official.

The metallic fittings and valves mentioned in this report are intended for installation above ground, below ground, indoors or outdoors and are suitable for use in concealed locations.

Viega ProPress fittings meet the requirements for Special Seismic Certification by seismic testing in accordance with the California Building Code Section 1705.12 and the International Building Code Section 1705.12 for nonstructural components. During testing, all pipes were supported at the maximum distances allowed by model plumbing codes. The products were qualified by time history shake table testing according to the procedures outlined in ICC-ES AC156. The shake table tests were performed at Structural Engineering and Earthquake Simulation Laboratory (SEESL) at the University of Buffalo in accordance with CBC-2013 and IBC-2012. The purpose of this testing is to demonstrate the suitability of Viega press-connect fittings in earthquake prone areas. A copy of the certification can be obtained under Report No. 1311-01 by W.E Gundy and Associates Inc. and is outside the scope of this report.

Models:

The Viega ProPress fittings are available in sizes from ½ inch (13mm) to 4 inches (108mm). Viega ProPress fittings are rated for a maximum operating pressure of 300 pounds per square inch (psi) (2068 kPa). Fittings are available in copper or copper alloy and are provided with a factory-installed EPDM (ethylene propylene diene monomer) sealing element. All fittings have a built-in Smart Connect (SC) feature. The function of the SC feature is to identify connections which have not been pressed.

| | DESCRIPTION | SIZE RANGE |
|----------|--|---------------------------------------|
| Adapter | Bronze Male Adapter: P x M NPT | ¹ / ₂ " to 2" |
| | Copper Male XL- C Adapter: P x M NPT | 2 ¹ / ₂ " to 4" |
| | Bronze Female Adapter: P x F NPT | ¹ / ₂ " to 2" |
| | Copper Female XL- C Adapter: P x F NPT | 2 ¹ / ₂ " to 4" |
| | Bronze Male Adapter: FTG x M NPT | ¹ / ₂ " to 2" |
| | Bronze Female Adapter: FTG x F NPT | ¹ / ₂ " to 2" |
| | Bronze PEX Press ProPress Adapter: PEX Press x P | ¹ / ₂ " to 2" |

Conditions of listing:

- 1. Fittings are for use with ASTM B 88, Type K, L, or M, copper or with ASTM B 75 copper tube having dimensions and temper in accordance with manufacturer's installation instructions.
- 2. Operating temperature range for potable water must be within 32°F to 250°F (0°C to 121°C). Operating temperature range for hydronic systems must be within 0°F to 250°F (-17°C to 121°C).
- 3. The fittings have been evaluated and approved for below grade installation.
- 4. The potable water distribution system utilizing the Viega ProPress fittings must be pressuretested and inspected in accordance with IPC Section 312.5, IRC Section P2503 or UPC Section 609.4, as applicable.
- 5. Radiant heating systems must be pressure-tested for leaks before installation of the covering in accordance with IMC Section 1208 or IRC Section M2103, as applicable.
- The fittings are under a quality control program with annual surveillance inspections by ICC-ES.
